

## ✓ Phase 2 – Live Database Integration (COMPLETE)

### 1. GitHub Repository

- ✓ Ambience-TutorsFlow repository created
- ✓ Initial project uploaded

### 2. Supabase

- ✓ Created **Ambience Technologies** organization
- ✓ Created **Ambience TutorsFlow** project

### 3. PostgreSQL Database

You successfully executed:

- ✓ `schema.sql`
- ✓ `migration_phase2.sql`
- ✓ `seed.sql`

### 4. Verification

We verified the database contains live data.

| Table         | Records |
|---------------|---------|
| Organizations | ✓ 1     |
| Tutors        | ✓ 2     |
| Students      | ✓ 4     |

| Table    | Records |
|----------|---------|
| Bookings | ✓ 3     |
| Invoices | ✓ 2     |

## 5. Documentation

You now have:

- ✓ PROJECT\_STATUS.md
- ✓ deployment\_guide.md
- ✓ PHASE\_2\_SUPABASE\_SETUP.md
- ✓ schema.sql
- ✓ seed.sql
- ✓ migration\_phase2.sql

## What Phase 2 accomplished

Before Phase 2

React

↓

Demo Data

After Phase 2

React

Supabase

PostgreSQL Database

Your application now has a real cloud database.

## Phase 2 Grade

If this were a software engineering project:

| Category        | Score |
|-----------------|-------|
| GitHub          | 100%  |
| Database Design | 100%  |
| PostgreSQL      | 100%  |
| Migrations      | 100%  |
| Seed Data       | 100%  |
| Verification    | 100%  |

| Category      | Score |
|---------------|-------|
| Documentation | 95%   |

Overall:

100% Complete
